Band is... **M**aking music with a family of lifelong friends.

Understanding how commitment and dedication lead to success.

Sharing the joy and rewards of working together.

Individuals who develop self-confidence.

Creativity—expressing yourself in a universal language.

Band is... **MUSIC!**

Strike up the band,

Tim Lautzenheiser

Trombones were known to exist in the 15th century. Unlike other instruments, the shape of today's instrument remains close to the original. In the 16th century, trombones were a common town and court band instrument. There are several kinds of trombones, and the tenor is the most common. Valve trombones were developed in the 1800s. In 1839, the bass trombone was invented. An extension allows this instrument to play lower notes.

The trombone's slide gives the instrument unique playing features. An extremely important member of the concert band as well as a popular jazz instrument, trombones play solos, melodies and harmonies.

G. Gabrieli, Beethoven, Mahler and Stravinsky are important composers who have included trombones in their writing. Some famous trombone performers are Glenn Miller, Urbie Green, Bill Watrous and Kai Winding.

THE BASICS

Posture

Sit on the edge of your chair, and always keep your:

- Spine straight and tall
- Shoulders back and relaxed
- Feet flat on the floor

Breathing & Airstream

Breathing is a natural thing we all do constantly. To discover the correct airstream to play your instrument:

- Place the palm of your hand near your mouth.
- Inhale deeply through the corners of your mouth, keeping your shoulders steady. Your waist should expand like a balloon.
- Slowly whisper "tah" as you gradually exhale air into your palm.

The air you feel is the airstream. It produces sound through the instrument. Your tongue is like a faucet or valve that releases the airstream.

Producing The Essential Tone

"Buzzing" through the mouthpiece produces your tone. The buzz is a fast vibration in the center of your lips. Your embouchure (*ahm'-bah-shure*) is your mouth's position on the mouthpiece of the instrument. A good embouchure takes time and effort, so carefully follow these steps for success:

BUZZING

- Moisten your lips.
- Bring your lips together as if saying the letter "m."
- Relax your jaw to separate your upper and lower teeth.
- Form a slightly puckered smile to firm the corners of your mouth.
- Direct a full airstream through the center of your lips, creating a buzz.
- Buzz frequently without your mouthpiece.

MOUTHPIECE PLACEMENT

- Form your "buzzing" embouchure.
- Place the mouthpiece approximately 2/3 on the upper lip and 1/3 on the lower lip. Your teacher may suggest a slightly different mouthpiece placement.
- Take a full breath through the corners of your mouth.
- Start your buzz with the syllable "tah." Buzz through the center of your lips keeping a steady, even buzz. Your lips provide a cushion for the mouthpiece.

Taking Care Of Your Instrument

Before putting your instrument back in its case after playing, do the following:

- Use the water key to empty water from the instrument. Blow air through it.
- Remove the mouthpiece and slide assembly. Do not take the outer slide off the inner slide piece. Return the instrument to its case.
- Once a week, wash the mouthpiece with warm tap water. Dry thoroughly.

Trombone slides occasionally need oiling. To oil your slide, simply:

- Rest the tip of the slide on the floor and unlock the slide.
- Exposing the inner slide, put a few drops of oil on the inner slide.
- Rapidly move the slide back and forth. The oil will then lubricate the slide.
- Be sure to grease the tuning slide regularly. Your director will recommend special slide oil and grease, and will help you apply them when necessary.

MOUTHPIECE WORKOUT

Using only the mouthpiece, form your embouchure carefully. Take a deep breath without raising your shoulders. Begin buzzing your lips by whispering "tah" and gradually exhale your full airstream. Strive for an even tone.

Getting It Together

- Step 1** Lock the slide by turning the slide lock ring to the right. Carefully put the slide into the bell section at a 90° angle. Tighten the connector nut to hold the two sections together.
- Step 2** Carefully twist the mouthpiece to the right into the mouthpiece receiver.
- Step 3** Place your left thumb under the bell brace, and your index finger on top of the mouthpiece receiver. Gently wrap your other fingers around the first slide brace.
- Step 4** Place your right thumb and first two fingers on the second slide brace.
- Step 5** Support the trombone with your left hand only. Unlock the slide. Your right hand and wrist should be relaxed to move the slide comfortably. Hold the trombone as shown:

READING MUSIC

Identify and draw each of these symbols:

Music Staff

The **music staff** has 5 lines and 4 spaces where notes and rests are written.

Ledger Lines

Ledger lines extend the music staff. Notes on ledger lines can be above or below the staff.

Measures & Bar Lines

Bar lines divide the music staff into **measures**.

Long Tone

To begin, we'll use a special "Long Tone" note. Hold the tone until your teacher tells you to rest. Practice long tones each day to develop your sound.

1. THE FIRST NOTE

Hold each long tone until your teacher tells you to rest.

F

1

To play "F," bring the slide up to first position.

The Beat

The **beat** is the pulse of music, and like your heartbeat it should remain very steady. Counting aloud and foot-tapping help us maintain a steady beat. Tap your foot **down** on each number and **up** on each "&."

One beat = 1 &

Notes And Rests

Notes tell us how high or low to play by their placement on a line or space of the music staff, and how long to play by their shape. **Rests** tell us to count silent beats.

Quarter Note = 1 beat

Quarter Rest = 1 silent beat

Note Names

Each note is on a line or space of the staff. These note names are indicated by the Bass Clef.

THEORY

Sharp # raises the note and remains in effect for the entire measure.

Flat \flat lowers the note and remains in effect for the entire measure.

Natural \natural cancels a flat (\flat) or sharp (\sharp) and remains in effect for the entire measure.

HISTORY

Japanese folk music actually has its origins in ancient China. "Sakura, Sakura" was performed on instruments such as the **koto**, a 13-string instrument that is more than 4000 years old, and the **shakuhachi** or bamboo flute. The unique sound of this ancient Japanese melody results from the pentatonic (or five-note) sequence used in this tonal system.

Ragtime is an American music style that was popular from the 1890's until the time of World War I. This early form of jazz brought fame to pianists like "Jelly Roll" Morton and Scott Joplin, who wrote "The Entertainer" and "Maple Leaf Rag." Surprisingly, the style was incorporated into some orchestral music by Igor Stravinsky and Claude Debussy.

A special trombone technique used in ragtime and other styles of music is called a glissando, which looks like this: To play a glissando, move your slide without tonguing and use a full airstream. Remember that glissandos are different from legato tonguing (slurs).

Solo with Piano Accompaniment

You can perform this solo with or without a piano accompanist. Play it for the band, the school or your family. It is part of **Symphony No. 9 ("From The New World")** by Czech composer **Antonin Dvorák** (1841–1904). He wrote it while visiting America in 1893, and was inspired to include melodies from American folksongs and spirituals. This is the **Largo** (or "very slow tempo") theme.

THEORY

Scale

A **scale** is a sequence of notes in ascending or descending order. Like a musical "ladder," each step is the next consecutive note in the key. This scale is in your Key of B \flat (two flats), so the top and bottom notes are both B \flat 's. The interval between the B \flat 's is an octave.

147. CONCERT B \flat SCALE

THEORY

Chord & Arpeggio

When two or more notes are played together, they form a **chord** or **harmony**. This B \flat chord is built from the 1st, 3rd and 5th steps of the B \flat scale. The 8th step is the same as the 1st, but it is an octave higher. An **arpeggio** is a "broken" chord whose notes are played individually.

148. IN HARMONY

Divide the notes of the chords between band members and play together. Does the arpeggio sound like a chord?

HISTORY

Austrian composer **Franz Josef Haydn** (1732–1809) wrote 104 symphonies. Many of these works had nicknames and included brilliant, unique effects for their time. His Symphony No. 94 was named "The Surprise Symphony" because the soft second movement included a sudden loud dynamic, intended to wake up an often sleepy audience. Pay special attention to dynamics when you play this famous theme.

Solo with Piano Accompaniment

Performing for an audience is an exciting part of being involved in music. This solo is based on *Symphony No. 1* by German composer **Johannes Brahms** (1833–1897). He completed his first symphony in 1876, the same year that the telephone was invented by Alexander Graham Bell. You and a piano accompanist can perform this for the band or at other school and community events.

185. THEME FROM SYMPHONY NO. 1 – Solo (Concert E \flat version)

Johannes Brahms
Arr. by John Higgins

Allegro

The musical score is written for Trombone and Piano. It begins with a 4/4 time signature and a key signature of two flats (E-flat major). The tempo is marked **Allegro**. The score is divided into systems. The first system shows the Trombone part starting with a rest, followed by a melodic line starting on a whole note G2. The Piano part provides accompaniment with chords and moving lines. Dynamics include *mf* (mezzo-forte). A first ending bracket spans measures 3-5, with a '3' in a box above measure 3. The second system continues the melodic development in the Trombone and accompaniment in the Piano. Dynamics include *p* (piano). The third system shows the Trombone part with a *f* (forte) dynamic, followed by a *mf* dynamic. The Piano part also has *f* and *mf* dynamics. A measure number '13' is placed above the first measure of this system. The fourth system features first and second endings. The first ending leads back to the beginning of the system, while the second ending concludes with a final cadence. Dynamics include *f*. The score concludes with a double bar line.

DUETS

Here is an opportunity to get together with a friend and enjoy playing music. The other player does not have to play the same instrument as you. Try to exactly match each other's rhythm, pitch and tone quality. Eventually, it may begin to sound like the two parts are being played by one person! Later, try switching parts.

CREATING MUSIC

THEORY

Composition

Composition is the art of writing original music. A composer often begins by creating a melody made up of individual **phrases**, like short musical "sentences." Some melodies have phrases that seem to answer or respond to "question" phrases, as in Beethoven's *Ode To Joy*. Play this melody and listen to how phrases 2 and 4 give slightly different answers to the same question (phrases 1 and 3).

1. ODE TO JOY

Ludwig van Beethoven

2. Q. AND A. Write your own "answer" phrases in this melody.

3. PHRASE BUILDERS Write 4 different phrases using the rhythms below each staff.

4. YOU NAME IT:

Pick phrase A, B, C, or D from above, and write it as the "Question" for phrases 1 and 3 below. Then write 2 different "Answers" for phrases 2 and 4.

THEORY

Improvisation

Improvisation is the art of freely creating your own melody *as you play*. Use these notes to play your own melody (Line A), to go with the accompaniment (Line B).

5. INSTANT MELODY

You can mark your progress through the book on this page. Fill in the stars as instructed by your band director.

Instrument Care Reminders

Before putting your instrument back in its case after playing, do the following:

- Use the water key to empty water from the instrument. Blow air through it.
- Remove the mouthpiece and slide assembly. Do not take the outer slide off the inner slide piece. Return the instrument to its case.
- Once a week, wash the mouthpiece with warm tap water. Dry thoroughly.

Trombone slides occasionally need oiling. To oil your slide, simply:

- Rest the tip of the slide on the floor and unlock the slide.
- Exposing the inner slide, put a few drops of oil on the inner slide.
- Rapidly move the slide back and forth. The oil will then lubricate the slide.
- Be sure to grease the tuning slide regularly. Your director will recommend special slide oil and grease, and will help you apply them when necessary.

CAUTION: If a slide or your mouthpiece becomes stuck, ask for help from your band director or music dealer. Special tools should be used to prevent damage to your instrument.
